CANNON
FIRE + SAFETY SYSTEMS

Welcome

Cannon Fire & Safety Systems offers companies, large and small, specialist fire and safety products and services, complemented and supported by relevant training programmes that are fully certified and up-to-date. The company operates a nationwide service backed up by a 24 hour call monitoring facility.

Established by Brian Cannon in 2000, a well respected and experienced fire and safety engineer, the company has grown from strength to strength culminating in the delivering of a first class, bespoke, fire, safety and training service to a wide range of clients nationally.

The company is very much to the forefront of fire and safety technology ensuring all members of the population

are properly protected and catered for including the elderly, deaf and blind. Brian, himself partially deaf, understands the need to ensure that the latest technology available is promoted and utilised to ensure that everyone is given the correct level of care. To this end Brian has taken on the challenge of promoting and installing specialist Deaf & Blind Fire Alarm systems in hotels and guest-houses as well as Nurse Call Systems in hospitals and nursing homes.

At Cannon Fire & Safety Systems we pride ourselves on the level of service and expertise we offer our clients at competitive rates. We are certain our current client base will attest to this assertion. All our staff are fully trained and up-to-date with current safety standards and technologies.

At Cannon Fire & Safety Systems we pride ourselves on the range of products and the level of service we offer customers. To this end we are constantly reviewing what we offer, continuously ensuring we keep up-to-date with the latest technologies and safety standards.

The following is a list of the main products and services we can provide. For further information or to enquire about a product or service not listed, please do not hesitate to contact us.
